| • Systems | : Windows |

Employment History

- Brillquest Technologies Pvt Ltd

April 2023 – April 2026

Work Experience

Project I: Chemist warehouse

MAY 2023 – March 2026

Domain: E- commerce

Environment: Playwright using JavaScript, SQL, Playwright API, Postman, GitHub Actions

Description: Chemist Warehouse is a large Australian retail pharmacy chain operating both in Australia and internationally. They are known for their wide range of products, including prescription and non-prescription medications, vitamins, personal care items, beauty products, and more. Chemist Warehouse is recognized for its aggressive pricing strategy, offering competitive prices on a wide variety of health and beauty products.

Roles & Responsibilities:

- Created robust end-to-end test scripts using Playwright with JavaScript for web applications and developed and maintained custom test automation frameworks with reusable components and utilities.
- Integrated Playwright test suites into CI/CD pipelines using tools like GitHub Actions.
- Executed tests across various browsers to ensure UI consistency. Created and managed structured test data in SQL databases for automation test cases.
- Performed API validations using JavaScript libraries or integrated tools like Playwright's API Request Context.

Education

Bharathidasan Engineering College - Anna University

2016 - 2020

Bachelor of Technology in Information Technology
